Dice job report and outlook: Increased demand for Tech Talent is in the horizon

Tech innovation over the past decade, ranging from wearable technology to the integration of mobile and PC, has been nothing short of unprecedented. Even so, the future shows exciting opportunities related to the "Internet of Things," cloud computing and artificial intelligence. Microsoft has projected that the lockdowns associated with COVID-19 have also accelerated digitization, and that by 2025, there will be an estimated 149 million new technology jobs. Yet, while these possibilities pave the way to the future, the lack of readily available professionals within organizations that offer these advanced skillsets has the potential to inhibit innovation. If companies want to innovate, they need technologists to power that change. At the same time, businesses must continue to employ technologists with skills that can keep core functionalities running, such as maintaining infrastructure amidst increasingly dispersed teams and protecting consumer data globally.

DIGITAL JOB CAPACITY FROM 2020 TO 2025

## Apply for the Global IT Scholarship Program

Global Information Technology is proud to provide the GIT Scholarship Program. Every month, this scholarship will be awarded to highly driven individuals wanting to begin or advance their IT career. Exclusively, the scholarship will provide a grant of $2,500.00 towards any certification course or remote live training at GIT.

GIT created this opportunity to give back to the community and spread our desire to help those in need. We believe that learning is essential and we will continue to help and develop individuals to help them succeed in their personal development goals.

Career Guide

Quick & to the point - Career Advice

Question: "Covid has caused A LOT of changes to how people are looking for work, or need to adapt topic?"
- *Darren Klireskey*

Answer: There is much that can be covered here, but here are a few things that come to mind: First, events will be cancelled for a while, so you'll need to find a new networking strategy. Seek out like-minded professionals online and ask about virtual events. Look for professional groups to join on Facebook and LinkedIn. Now is also the perfect time to work on bolstering your qualifications. Analyze job descriptions by listing each required skill and experience. Use that information to determine what you need to brush up on to make yourself an even better candidate when the job market picks up again. This pandemic will not last always. Once we are able to return to some since or normalcy you will want to know your time was well spent.

GIT launches new course offering in Data Science with Python, Machine Learning, and Artificial Intelligence

Individuals looking for a career in programming or are currently working as developers, programmers, or web developers should attend this course. The course covers basic data science, ETL with Machine Learning, Deep Learning A.I along with all advance features that an individual will perform as a data science professional. So, this course will help IT Developer, Project Manager and Analytics Professional to grow in their analytics journey.

Do not miss out on your opportunity to enroll into one our cutting-edge technology classes, taught by our world class instructors! GIT's complete course schedule can be found here: https://www.global-itech.com/online-schedule/

GIT thought provoking corner

"Character is the ability to carry out a good resolution long after the excitement of the moment has passed." - Cavett Robert

All eyes on Detroit

In Detroit, the technology industry has been quietly growing in recent years, with moves into the city by digital media giants such as Twitter, Amazon, and Google. Detroit's technology sector has generated 74,821 new jobs over the last decade and contributed around $24.2 billion to the local economy. Alongside Big Tech, though, a small but mighty sector of Detroit-based companies has emerged — and they're giving Silicon Valley a run for its money.

Global Information Technology - Coronavirus (COVID-19) Update

Are classes still running?
All classes are running virtual instructor-led classroom environment until the end of February 2021 (subject to change based on guidance from local health authorities). In any case, you can retake the class for free within a year (see below). Our live, virtual instructor-led classroom training is interactive and hands-on, just like our in-person classes. There are no extra fees and we will work with you to ensure your setup is perfect.

Free Retake Period Extension
We have extended the free retake period up to one and half years for any signups or class dates between March 31, 2020 and February 30, 2021. This allows you to attend live virtual, instructor-led classrooms now and come back in-person anytime within one and half year of the class date.

Re-scheduling
We are allowing attendees to re-schedule at no charge or keep class credit for up to 1 ½ years. Email us at info@global-itech.com.

Student and Staff Protections
We are monitoring all developments and following CDC and local health authority guidelines. We are also committed to the following:
- Providing hand sanitizer, disinfectant wipes, and washing stations
- Cleaning each room before and after each class
- Requiring all students and instructors to follow hygiene guidelines before entering a classroom
- Limiting in-person attendees per class to keep spacing between students
- Not allowing any students or staff to enter the facilities who exhibit symptoms

Protect Yourself & Others
See the World Health Organization's advice for best practices: https://www.who.int/emergencies/diseases/novel-coronavirus-2019/advice-for-public

A day in the life of a AI Chief Architect

Most AI Chief Architects wear two hats - one as a researcher looking at new developments in AI, the second in Product Management role to understand the needs or problems of businesses, then suggest the right AI powered solutions for them. Other time is devoted to research and development around ML or AI. Everything else rests in the details of all the above.

GIT career workshops Learn for FREE Each Day
